MaxPrint

MaxPrint™, Anchor Software's industry-leading document preparation program provides easy design, proofing, set-up and control of high speed, state-of-the-art printers with little or no specialized training. It's designed to print intricate, highly personalized letters to IPDS, AFP, Postscript, Metacode, PCL5 printers, or any Windows Driver, such as fax and PDF.

MaxPrint also supports all versions of the Intelligent Mail barcode, including the Intelligent Mail Tray and Container Labels.

FEATURES

MaxPrint™ uses a 100% WYSIWYG Design Interface, with the ability to import PDF, Word, Word perfect and RTF files directly into the graphical design environment, with integrated spell-check before the job is printed. MaxPrint allows you to print directly to printers or spool "Book" or PDF files for archiving or reprinting. MaxPrint also has the ability to use a scanned form for design overlays, and supports TIFF, PCX, BMP and JPEG files as well as 2D and 3D barcodes and color charts and graphs in line.

Other features of MaxPrint include:

- E-mail sign-off via powerful viewer
- Mass Email file as well as paper print
- Statement and Invoice printing
- Archive to CD-ROM for POD (Print on Demand)
- Print any degree rotation
- Print circles and variable boxes with shading
- Unlimited file size inputs: fixed, variable, delimited, DBF, ODBC.
- Conditional logic and tables for unlimited variable lookups
- Supports TCP/IP output

NEW FEATURES

- import and edit PDF or quark documents
- intelligent mail barcodes
- Print all the Intelligent Mail barcodes on your mailpieces, tray tags and pallet tags.

COMPONENTS

MaxDesigner – Brand new, WYSIWYG design interface, faster and RAM thrifty...

Max Viewer – View and Proof "Book" files from multiple locations prior to printing...
