Transaction Designer

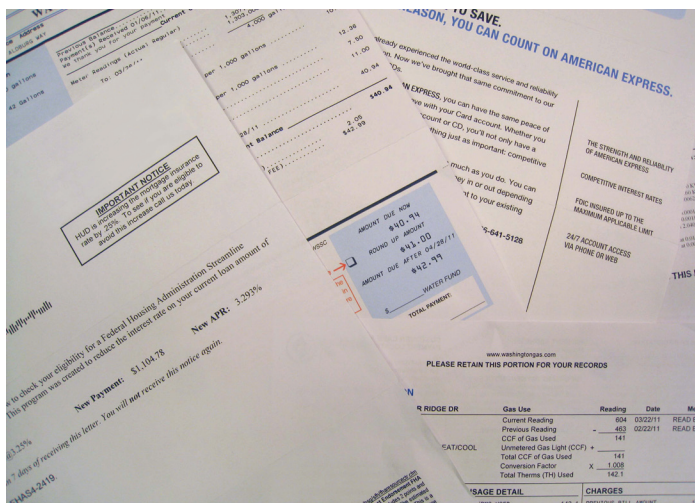

Statement Composition Made Easy in MaxPrint

Anchor Software introduces Transaction Designer a revolutionary program in statement creation. Transaction Designer is a new graphical design tool for the composition of complex transactional documents within the MaxPrint document composition environment. With Transaction Designer users can intuitively design and configure complex statements, invoices and other transactional documents faster and easier than ever before.

FEATURES

Transaction Designer uses a simple, easily mastered GUI that allows construction of hierarchical data relationships in WSIWYG environment. The program allows you to define and extract data from multiple database records, then use the data calculation cache to configure output calculations to be printed on any page of the document

Transaction Designer gives the user control over statement section and object characteristics. Personalized customer messaging and data driven bar charts and graph creation allow you to present information clearly. Simple controls allow multiple output formatting sections for the record set of extracted data, and advanced white space management guarantees the readability of your documents. Dynamic Pagination prints page number and total number of pages in the statement (e.g. Page 1 of 5), and intelligent page overflow means your documents make sense to your customers.

Professional Services

Our professional services team is there to provide the knowledge and experience your organization can rely upon to implement the creation of complex transactional documents.

Advantages

Transaction Designer minimizes the complexity of creating statement, invoice and other transactional documents, and reduces set up time and labor costs. It eliminates the need for complex scripting logic and custom programming and nearly all external pre-processing requirements. It turns your statements and invoices into personalized customer communication channel

Technical Support and Training

Customer support is provided 24 hours a day, year-round, including weekends. Classroom instruction is offered at the Plano, Texas facility, or at a customer's site by special arrangement.

Anchor Software offers the most innovative, complete solution available. Call us toll free at 800-237-1921.
