

# DataDialog

## Product Information

## The first all-purpose software developed to create complex processes without programming knowledge.

DataDialog uses an easy to use wizard-driven approach that helps non programmers create extremely powerful processes without the need of learning an extensive script language.

### IT'S A LANGUAGE...

Anchor Software's Data Dialog software contains all the ingredients of a traditional programming tool: move, copy, math, if/then/else, sub processing, I/O and logic loops, etc. Data Dialog uses an easy, English-like syntax and commands designed for typical data hygiene and data manipulation tasks

### ... WITH ITS OWN TUTOR...

Every command is fully explained interactively and can be constructed via an easy-to- follow wizard. To use Data Dialog you simply click on the command(s) and fill in the blanks

### ... AND POWERFUL MACROS!

Pre-defined commands in Data Dialog make complex processing easier. You can also use macros to manipulate groups of records, parse fields, dedup, match on condition, Nth selects, trig functions, check digits, longitude and latitude calculations, and much more. Data Dialog also lets you create, save and reuse your own macros.

- Intelligent Scripting Tool
- Auto-Pilot
- Flexible Input/Output

## TECH SUPPORT & TRAINING

Customer support is provided 24 hours a day, 365 days per year. And Classroom instruction is offered at the Plano, Texas facility, or at a customer's site. Anchor Software offers the most innovative, complete solution available. Call us toll free at 800-237-1921.

**DupElim Command Builder**

File to scan for duplicates (pre-sorted):

Input File [ ]

Fields to compare (must pick at least one)

Field 1: [ ]

Field 2: [ ]

Field 3: [ ]

Field 4: [ ]

Actions (must pick at least one)

Set result variable TRUE / FALSE if Dup / not Dup

[ ]

Goto label if duplicate

[ ]

Write duplicates to file

[ ]

Compare fields case sensitive (default is without regard to case)

Build Cancel
