MyPAF, Anchor Software's easy-to-use web-based solution for creating, importing, maintaining, and monitoring Processing Acknowledgement Forms (PAFs).

MyPAF is a paperless automated system that meets all USPS PAF requirements. MyPAF streamlines the PAF process by consolidating multiple functions that previously were performed by hand. MyPAF combines data entry, form completion, approval, electronic storage and reporting for NCOA<sup>Link</sup> processing into a single program, and allows you to store your PAF documents electronically rather than as a hard copy.

Whether as a hosted solution or in-house software, MyPAF reduces the labor associated with creating PAFs and eliminates the need to physically store PAFs, while enabling you to access and produce the hard copy if required.
